

Save contact brings them to the CRM.

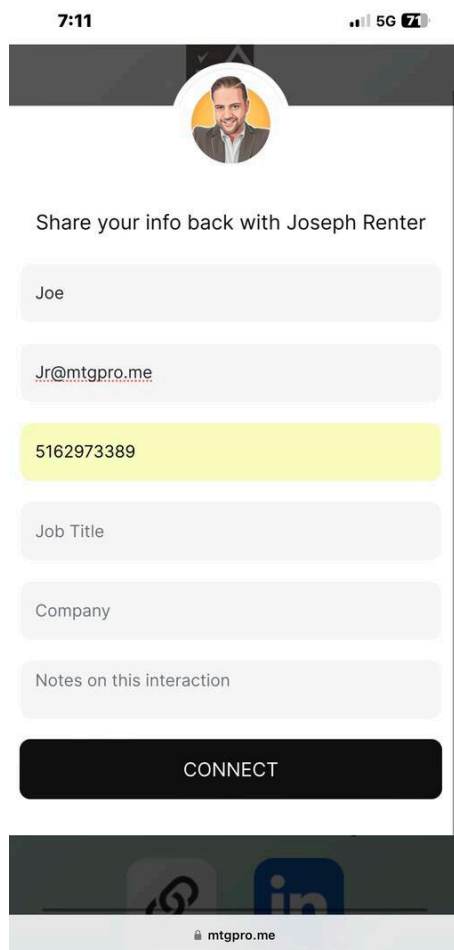

The CRM requires all this info but most of the time the subscriber will not need to know the company and job title of the person.

The phone number MUST say cell phone number so the subscriber can text them

This is not what save contact should be. Save contact should save the contact in the persons cell phone.

The way the CRM should work is IF it is turned on by the subscriber once the person clicks on one of the links or icons or anything, it pops up like this asking for whatever information the subscriber has requested in their dashboard for the CRM. Then once they complete it, it should take the link action they clicked.

The text “Share your info back with Joseph Renter” should be customizable by the subscriber also

7:11 5G 71

Share your info back with Joseph Renter

Joe

Jr@mtgpro.me

5162973389

Job Title

Company

Notes on this interaction

CONNECT

mtgpro.me

The image is a screenshot of a mobile application interface. At the top, there is a status bar showing the time as 7:11, 5G signal, and a battery icon with 71%. Below the status bar is a dark header with a circular profile picture of a man. The main content area has a title 'Share your info back with Joseph Renter'. Below the title are several input fields: 'Joe', 'Jr@mtgpro.me', '5162973389' (highlighted in yellow), 'Job Title', 'Company', and 'Notes on this interaction'. At the bottom of the form is a black button labeled 'CONNECT'. Below the form is a dark footer with social media icons for Facebook and LinkedIn, and the text 'mtgpro.me'.
